Analog Meters Matter!

Dirty Electricity Is Such a Terrible Problem!

*Read this short article and learn why dirty electricity is the terrible hidden problem with smart meters and **digital opt-out meters** and what you can do about it.*

| | | |
|--|--|--------------------|
| Digital opt-out meters create dirty electricity. |  | Insomnia |
| Smart meters create dirty electricity. | | Brain fog |
| Analog meters don't! | | Anxiety |
| If you can't get an analog, you need to filter. | | Tinnitus |
| | | Fatigue |
| | | Heart palpitations |
| | | Muscle cramping |
| | | Memory loss |

What Is Dirty Electricity?

See that image above? That's the electrical wave running through your wiring. It's supposed to be smooth, but instead you can see how spiky and erratic it is. *That's dirty electricity.*

It's pounding your body 24/7 in millisecond bursts, pulsing, constantly varying in intensity--just like radiofrequency radiation from your smart meter.

What causes it? Among other things, **smart and digital meters!** ☐

Detailed information on dirty electricity can be found at these links:

"I Got the Opt-Out Meter Why Am I Still Sick?"

When we got a smart meter opt-out in Michigan, many people got the digital, non-transmitting meter on their home.

Within days, people began calling me up. “Linda,” they’d say, **“I got the opt-out meter and I feel just as ill.”**

I'd tell them, "That's the dirty electricity."

“What can I do?” they’d ask.

And the only thing I could tell them at the time was, "Fight for the analog meter."

Find out what an [entire family experienced](#) when they moved from a home with an analog meter to a home with a digital opt-out meter.

Dirty Electricity Makes Me Sick

Me (Linda Kurtz, director of the Smart Meter Education Network) speaking at a rally we held at my house to protest DTE's (Dirty Toxic Electricity's) planned shut-off of myself and eight other people in the Ann Arbor, Michigan area. My then-analog meter is directly behind me.

For 5 1/2 years after my neighbors got smart meters, I kept my analog because I'd locked it up. But on September 15, 2017, I walked in my door and within 3 seconds my body began to clamp up and my head felt like it was being squeezed. I was afraid I was going to be paralyzed. I'd talked to people who had been.

Why? The electric company had installed a smart meter on my home. I ran downstairs and turned off the main breaker, shutting off all the electricity to my home.

There was *no* radiofrequency radiation coming into my home from the smart meter. I measured, with a superb meter. Besides, I had aluminum siding. Nothing was getting in.

The problem was dirty electricity. So for the next few days, I kept the electricity in my home turned off except when I left the house.

But, of course, I couldn't continue to live that way.

Solution: **Whole-House Dirty Electricity Filter**

Read [dozens of stories](#) from people harmed by dirty electricity and what they did about it.

Until early 2016, I knew of no way to truly protect oneself from dirty electricity (other than going without electricity at all). The commonly sold Stetzer and Greenwave plug-in filters made me sick as a dog! At the time, I didn't know why; I just knew having them in my home was no better than having dirty electricity. Many other people experience the same issues.

I've since learned why Stetzer and Greenwave filters are so problematic:

- They put a big magnetic field on the wiring (bad for health)
- They create leading current (bad for appliances)
- They filter only the hot wire—the neutral is untouched
- And on top of all that, the Greenwaves (and probably the Stetzers) add a 2 kHz frequency to the neutral wire; in other words, more dirty electricity.

I fought hard for an analog opt-out in Michigan for years *because* of this.

By 2015, I began to consider the fact that we might never get an analog opt-out. What was I going to do? I learned about a whole-house filter, the [Power Perfect](#), from a man who attended one of my talks. I wrote the filter off. After all, I reacted so badly to Stetzers and Greenwaves—how could this be any different?

Finally, I realized I had to try the [Power Perfect filter](#). Since 2000, I'd been unable to sleep when I visited my parents, tossing and turning every night I was there. This was the home I grew up in, and I always slept well there. I wrote off my inability to sleep to "emotions."

In 2012, when I talked to my dad about smart meters, he told me a new meter had been installed in the early 2000s. Turns out, it was installed in January 2000, the year I became unable to sleep when I visited.

According to the site eiWellspring, the type of electric meter my parents had was impossible to filter. So I figured, **"If this filter really is any good, it will filter their dirty electricity and I won't experience any negative reactions."**

Well, we installed the filter, the **dirty electricity levels went down 90%**, and I had no negative reactions! I've now been living in this very home for 2 1/2 years and sleeping well. I have none of the effects I typically experience with dirty electricity: insomnia, tinnitus, heart palpitations, transient memory loss, headaches, extreme fatigue, etc.

The filter is called the [Power Perfect](#). I now sell it because it works and because I finally have a solution for people.

At first I was very tentative about selling it. I thought, "It works for me, but what if it doesn't for others?" Thankfully, I immediately started getting very [positive feedback](#).

Please feel free to call me at 520-398-2985. With a 10-year warranty on the whole-house filters and 30-day returns, you can't go wrong!

For those with truly limited incomes, I offer no-interest payment plans.

Dirty Electricity

Dirty electricity causes many of the health problems people experience from smart meters. Reduce your dirty electricity levels by 90% by using the filter Linda Kurtz uses. Visit [NoDirtyElectricity.com](#), and feel free to call Linda at 520-398-2985.

Measure Your Dirty Electricity Levels

Rent or buy a DE meter.

-- **Rent:** \$21 for a week's rental. Call Linda at 520-398-2985 or email LindaKurtz@NoDirtyElectricity.com.

-- **Buy** the [SaticShield Line EMI Meter](#).

RF Meters, Bed Canopies, and More

Meters to measure RF levels, electrical fields, and magnetic fields. Bed canopies. Shielding materials. And more. Use coupon code **LindaK** at [Safe Living Technologies](https://www.SafeLivingTechnologies.com).
